Titles

A

Application of the United States Environmental Protection Agency's AERMOD Model to an Industrial Area 12
Assessing Ozone Networks Using Positive Matrix Factorization 110

B

Biodegradable Packaging Life-Cycle Assessment 342
Biofilm Barriers to Contain and Degrade Dissolved Trichloroethylene 69
Biological Treatment of Condensate from Aerobic Digestion of Biodegradable Waste: A German Example 215

C

Case Study of a Potency-Weighted Emission Screen 168
A Cohort-Based Approach for Characterizing Lifetime Inhalation Cancer Risk from Time-Varying Exposure to Air Toxics from Ambient Sources 120
Community Preparedness and Response Model for Addressing Environmental Risk and Vulnerability 126

D

Degradation of Chlorinated Organics by Membrane-Immobilized Nanosized Metals 232
Design and Operational Aspects of Airlift Bioreactors for Petroleum Biodesulfurization 206
Development of a Sustainable Liquid Fuels Infrastructure Based on Biomass 334
Development of Industrial Ventilation Course Website 102

E

Efficient Sampling Techniques for Uncertainties in Risk Analysis 141
Evaluating Chemical-, Mechanical-, and Bio-Pulping Processes and Their Sustainability Characterization Using Life-Cycle Assessment 347
Evaluation of Industrial Biotrickling Filter at the Flexographic Printing Facility 39

F

The Failure of Eco-Efficiency to Guarantee Sustainability: Future Challenges for Industrial Ecology 264

H

Hierarchical Thermodynamic Metrics for Evaluating the Environmental Sustainability of Industrial Processes 302

I

Incorporating Uncertainty in Chemical Process Design for Environmental Risk Assessment 315
Industrial Wastewater Treatment in a Membrane Bioreactor: A Review 59
Influence of Start-ups with Fuel-Oil on the Operation of Electrostatic Precipitators in Pulverised Coal Boilers 29

M

Methods for Incorporating Uncertainty into Dispersion and Deposition Models 158
A Model for Estimating Process Emissions from Gas Sweep Operations in Batch and Continuous Chemical Operations. 45

N

A New Conceptual Hierarchy for Identifying Environmental Sustainability Metrics 291
Nitrogen Oxides Emissions Reduction Technologies in the Petrochemical and Refining Industries 19

O

Open Letter to the Membership of the AICHE Environmental Division 253

P

Planning for the Future—Development of Action Criteria That Balance Regulatory Risks versus Market and Production Requirements at an Opthalmic Lens Coating Facility 135

R

A Review of Bioremediation and Natural Attenuation of MTBE 243

S

Selective Catalytic Reduction Performance in Steam–Methane Reformer Service: The Chromium Problem 194
Soil Lead Bioavailability and in Situ Remediation of Lead-Contaminated Soils: A Review. 78
Status of Life-Cycle Assessment of an Environmental Management Tool 277
Supercritical Fluid Extraction–Oxidation Technology to Remediate PCB-Contaminated Soils/Sediments: An Economic Analysis 222
Sustainable Development Performance Assessment. 271
Sustainable Engineering: An Initiative for Chemical Engineers 261

U

Use of Life-Cycle Inventory as a Screening Tool for Environmental Performance: Supercritical Carbon Dioxide in the Semiconductor Industry 284
Using Eco-Efficiency Analysis to Assess Renewable-Resource-Based Technologies 329

V

VOC Emission Fluxes as a Function of Lateral Distance from the Source. 52

W

Waste Minimization Techniques and Options for the Wet and Pretreatment Sections of Coil Coating Plants 185

Subjects

A

Aerobic Digestion 215
Air 12, 19, 29, 39, 45, 52, 110, 120, 158
Air Preheat 19
Anaerobic Digestion 215

B

Biofiltration 39
Biopulping. 347
Bioremediation 243
Biotrickling Filter. 39
Boiler Start-up 29
Business and Market Requirements 135

C

Cellulose Acetate Membrane 232
Chemical Pulping 347
Chromium Reduction. 194
Coal. 29
Coil Coating. 185
Combustion 29
Conceptual Hierarchy 291
Condensate 215
Corporate Sustainability Programs 271

D

DCE 232
Dechlorination. 232
Denitrification 215
Dispersion/Deposition Models. 158

E

Eco-efficiency 329
Economic Growth 264

Efficiency 141
Electrodes Fouling 29
Electrostatic Precipitators 29
Emissions 19, 45, 52, 168
Endpoint 291
Energy Efficiency 334
Entropy 264
Environmental Emissions 315
Environmental Performance Assessment 291
Environmental Risk 126
Environmental Risk Indexes 315
EPA Programs 12
Ethanol 334

F

Fe/Ni 232
Fermentation 334
Flue Gas Recirculation 19
Fuel-Oil 29

G

Gasification 334
Greenhouse Gas Emissions 342

H

Hammersley Sampling Technique 141
Hierarchical Thermodynamics Metrics 302

I

Industrial Effluents 59
Industrial Ventilation 102
Infinite Dilution Activity Coefficients 315
Inhalation Cancer Risks 120
Inventory Analysis 342

L

Latin Hypercube Hammersley Sequence 141
Lean Premix 19
Life-cycle Assessment (LSA) 277, 291, 347
Life-cycle Inventory 284
Low NOx Burners 19

M

Mass Balance 185
Mechnical Pulping 347
Membrane Bioreactor 59
Membrane Fouling 59
Membrane Processes 59
Metal Nanoparticles 232
Monitoring and Targeting 185
Monte Carlo Methods 315
MTBE 243

N

Nitrification 215
Nitrogen Gas Sweep 45
NOx 19

O

Opportunity 185
Option 185

P

PCB Contamination 222
